

YOUR CONTACT PARTNERS

INTERPRETERS AND MIGRATION OFFICERS ARE YOUR CONTACT PARTNERS

No matter where you come from, we would like to help you. Language communication is a prerequisite of successful treatment. Vitos relies on personnel with language skills.

For this reason, we have interpreters and migration officers who can speak to you and help you with your specific concerns at all hospital sites.

We respect all individual religious requirements and nutrition forms. You can talk to us on these matters.

Ask us, if you want to speak to the local migration officer. Alternatively, you can send our personnel an email:

WELCOME TO VITOS

OFFERS FOR PATIENTS
FROM FOREIGN COUNTRIES
AND CULTURES

WE HELP

Do you or your family member suffer from a mental illness, such as depressions, schizophrenia, anxiety disorders, drug addictions or dementia? – We are the right people you should ask. We want to help patients to recover and to stay in good health. Here we would like to inform you about our facilities, offers and important contact partners.

WHO ARE WE?

Vitos is the most important provider for outpatient, inpatient and day hospital treatment of psychically ill people in Hesse. Our physicians, nurses and therapists use modern therapies and respond to your individual wishes.

WHAT DOES VITOS OFFER?

People may fall psychically or physically ill. Or perhaps they have a handicap or a development disorder. In this case, we treat them, take care of them and accompany them. Our offers are intended for children, young people and adults. Due to our numerous sites, we can provide our services at close distance to your place of residence – at our hospitals, day clinics, outpatient units and in residential groups.

- We help you in critical situations.
- We advise and support you – and your family members, if you request us to – at our facilities.
- We take your personal life situation in account.

We talk to you and develop a suitable treatment together with you. As a matter of course, we deal confidentially with your personal data and statements. Our personnel is bound by professional secrecy.

WHOM CAN YOU ADDRESS?

Ask your general practitioner or your specialist for local Vitos facilities, or have them refer you. In urgent cases, however, treatment is possible also without a hospitalization letter from a physician.
